This book is an English translation from the French, of Gerard de Sede's Rennes mystery, the fascinating tale of the treasures of the Visigoths. The mysterious priest of Rennes-le-Chateau, Berenger Sauniere, who uncovered this secret beckons us to follow the clues he built into his domain as a legacy for those of the future. It is a tale steeped in mystery and intrigue, and the blood of those who met untimely deaths in search of the treasures.

Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.

Outlines a mystical theology and experience of the sacred founded on the absence of god. Originally published in 1943, Inner Experience is the single most significant work by one of the twentieth century's most influential writers. It outlines a mystical theology and experience of the sacred founded on the absence of god. Bataille calls Inner Experience a "narrative of despair," but also describes it as a book wherein "profoundly and passion go tenderly hand in hand." Herein, he says, "The mind moves in a strange world where anguish and ecstasy take shape." Bataille's search for experience begins where religion, philosophy, science, and literature leave off, where doctrines, dogmas, methods, and the arts collapse. His method of meditation, outlined and documented here, commingles horror and delight. Laughter, intoxication, eroticism, poetry, and sacrifice are pursued not as ends in and of themselves but as means of access to a sovereign realm of inner experience. This new translation is the first to include Method of Meditation and Post-Scriptum 1953, the supplementary texts Bataille added to create the first volume of his Summa Atheologica. This edition also offers the full notes and annotations from the French edition of Bataille's Oeuvres Complètes, along with an incisive introductory essay by Stuart Kendall that situates the work historically, biographically, and philosophically.

Daniel Albero Santacreu presents a wide overview of certain aspects of the pottery analysis and summarizes most of the methodological and theoretical information currently applied in archeology in order to develop wide and deep analysis of ceramic pastes. The book provides an adequate framework for understanding the way pottery production is organised and clarifies the meaning and role of the pottery in archaeological and traditional societies. The goal of this book is to encourage reflection, especially by those researchers who face the analysis of ceramics for the first time, by providing a background for the generation of their own research and to formulate their own questions depending on their concerns and interests. The three-part structure of the book allows readers to move easily from the analysis of the reality and ceramic material culture to the world of the ideas and theories and to develop a dialogue between data and their interpretation. Daniel Albero Santacreu is a Lecturer Assistant in the University of the Balearic Islands, member of the Research Group Arqueo UIB and the Ceramic Petrology Group. He has carried out the analysis of ceramics from several prehistoric societies placed in the Western Mediterranean, as well as the study of handmade pottery from contemporary ethnic groups in Northeast Ghana.

Finally, Grieve focuses on the misogynistic elements of the story and asks why the fall of Spain is figured as a cautionary tale about a woman's sexuality.

Les invasions d'espèces introduites provoquent des nuisances d'ampleur variable sur les écosystèmes concernés et il revient à la société d'en gérer les conséquences. Comment prévenir les invasions biologiques ? Comment évaluer le risque qu'elles représentent ? Que peut-on faire pour lutter contre les invasions en cours ? Sensibilisé à cette problématique, le ministère en charge de l'écologie a sollicité une communauté de chercheurs, issus de disciplines variées, afin d'appréhender ces questions selon des approches biologiques, sociologiques et économiques. Si la réponse unique et universelle aux problèmes que posent les espèces envahissantes dans les espaces naturels n'est pas apportée ici, les avancées indéniables dans la compréhension des mécanismes qui sous-tendent ces invasions permettront d'éclairer les décisions qui seront à prendre par les gestionnaires de l'environnement. Les scientifiques, enseignants et étudiants y trouveront également des résultats et réflexions qui enrichiront leurs connaissances.

SickKids Handbook of Pediatric Thrombosis and Hemostasis takes the reader through the entire field of paediatric thrombosis and hemostasis. This practical reference book will be a convenient, comprehensive, source of information and provides up-to-date, evidence-based guidance in the diagnosis and management of inherited and acquired bleeding disorders and thrombotic events of the venous, arterial, cardiac and central nervous systems that affect children, including the neonate. Written and reviewed by international experts in the field, SickKids Handbook of Pediatric Thrombosis and Hemostasis will guide health care professionals involved in the assessment and care of children with all types of bleeding and clotting disorders, including general and specialist pediatricians, in particular intensivists, neonatologists, cardiologists/cardiac surgeons, rheumatologists and nephrologists; hematologists/oncologists as well as nurses, nurse practitioners and pharmacists. Written in a user-friendly, algorithmic approach, the resource will serve students and trainees and assist teachers in developing practical lessons.

The question of restoring women to the ordained diaconate surfaced during the Second Vatican Council and continued to resound in academic and pastoral circles well after the diaconate was restored as a permanent order in the church in the West. This volume contains twelve essays—five translated from Italian, three translated from French, and four in their original English—that answer the questions about the history and possible future of women deacons. Essays by: Yves Congar, OP Philippe Delhaye Peter Hünermann Valerie A. Karras Corrado Marucci, SJ Pietro Sorci, OFM Jennifer H. Stiefel Cipriano Vagaggini, OSB Cam Phyllis Zagano Ugo Zanetti, OSB

Interest in the study of early European cultures is growing. These cultures have left us objects made of gold, other metals and ceramics. The advent of metal detectors, coupled with improved analytical techniques, has increased the number of findings of such objects enormously. Gold was used for economic and ceremonial purposes and thus the gold objects are an important key to our understanding of the social and political structures, as well as the technological achievements, of Bronze and Iron Age European societies. A correct interpretation of the information provided by gold and other metal objects requires the cooperation of experts in the fields of social, materials and natural science. Detailed investigation of gold deposits in Europe have revealed the composition and genesis of the deposits as sources of the metal. In Prehistoric Gold in Europe, a group of leading European geoscientists, metallurgists and archaeologists discuss the techniques of gold mining and metallurgy, the socioeconomic importance of gold as coinage and a symbol of wealth and status, and as an indicator of religious habits, as well as a mirror of trade and cultural relations mirrored by the distribution and types of gold objects in prehistoric times.
