1999 P.E.A.R.L. Nominee for Best Sci-Fi! (Paranormal Excellence Award for Romantic Literature) IN A PEACEFUL NEW ENGLAND VILLAGE, TERROR LIES LURKING BENEATH THE SURFACE... Phillipsport, Maine seems to be the perfect place for novelist Rick Sycek to settle in to. A small seaport village, it is quaint and peaceful, just what Rick needs in order to write his next novel. On his drive into town Rick runs over what appears to be a large crab in the road. About the size of a common house cat and sporting a segmented tail that resembles the stinger of a scorpion, it is unlike any crustacean he or anybody else in town has seen before. Within the next day the town is literally besieged by hundreds of the creatures -- which Rick calls Clickers due to the sound their claws make as the click together -- as they ravage and plunder anything unlucky enough to get in their way. NOW THE WAVE OF TERROR BEGINS... Hundreds of Clickers literally beach themselves in a wave of terror that ends in horror and death for some...but it brings the town together collectively in a fight to drive the creatures back. Rick joins his new friends in fighting the creatures off only to discover that the Clickers aren't merely here to ravage and pillage. They are being driven up on the shores of this New England by instinct. For something is hunting the Clickers. Something far worse than any of them could ever imagine...

The 2006 Institute of Medicine (IOM) consensus study report From Cancer Patient to Cancer Survivor: Lost in Transition made recommendations to improve the quality of care that cancer survivors receive, in recognition that cancer survivors are at risk for significant physical, psychosocial, and financial repercussions from cancer and its treatment. Since then, efforts to recognize and address the unique needs of cancer survivors have increased, including an emphasis on improving the evidence base for cancer survivorship care and identifying best practices in the delivery of high-quality cancer survivorship care. To examine progress in cancer survivorship care since the Lost in Transition report, the National Cancer Policy Forum of the National Academies of Sciences, Engineering, and Medicine held a workshop in July 2017, in Washington, DC. Workshop participants highlighted potential opportunities to improve the planning, management, and delivery of cancer survivorship care. This publication summarizes the presentations and discussions from the workshop.

An adrenaline-charged tale of unrelenting suspense that sparks with raw and savage energy... The newspapers scream out headlines that spark terror across the city. Ten murders on the New York City subway. Ten grisly crimes that defy all reason -- no pattern, no m.o., no leads for police to pursue. The press dubs the fiend the "Subway Psycho"; the NYPD desperately seeks their quarry before the city erupts in mass hysteria. But they won't find what they're looking for. Because they all think that the killer is human. Only a few know the true story -- a story the papers will never print. It is a tale of abject terror and death written in grit and steel... and blood. The tale of a man who vanished into the bowels of the urban earth one night, taken by a creature of unholy evil, then left as a babe abandoned on the doorstep of Hell. Now he is back, driven by twin demons of rage and retribution. He is unstoppable. And we are all his prey... unless a ragtag band of misfit souls will dare to descend into a world of manmade darkness, where the real and unreal alike dwell in endless shadow. A place where humanity has been left behind, and the horrifying truth will dawn as a madman's chilling vendetta comes to light... Filled with gripping drama and harrowing doomsday dread, *The Light at the End* is the book that ushered in a bold new view of humankind's most ancient and ruthless evil; a mesmerizing novel from two acknowledged masters of spellbinding suspense.
